Experience

Software & Automation Developer

Jan 27, 2026 - Present

Praeco

Build applications and automated workflows, with hands-on work across data, infrastructure and local AI.

- **Application development.** Build front-end interfaces and back-end services, connecting the screens people use with the data and logic behind them.
- **Salesforce & workflow automation.** Develop Salesforce automations and build n8n workflows that connect business tools and handle recurring tasks.
- **Databases.** Set up and manage Supabase databases; write SQL to organize, retrieve and maintain data for applications and automated workflows.
- **Servers & private networks.** Set up and administer VPS servers, connect them through Tailscale private networks, and deploy and maintain self-hosted applications and open-source CRMs.
- **Web scraping & data extraction.** Build web scrapers and AI extraction workflows that collect information from websites and turn it into structured data.
- **Trading bot development.** Develop and debug trading bots, including the application logic and workflows used to automate trading tasks.
- **Machine learning & local AI.** Work with machine learning, run local AI models and fine-tune them for specific tasks.
- **Cybersecurity & debugging.** Support cybersecurity tasks; diagnose and fix issues in application code and automation workflows.

Automation & Integrations Specialist

Dec 14, 2023 - Apr 26, 2025

Fundflare / Graceful FundFlare

- Built and maintained **Zapier** and **n8n** workflows connecting Google Workspace, Monday.com, Notion, PandaDoc and custom REST APIs.
- Developed **Google Apps Script** and **Google Sheets** tools for reporting, QA checks and lightweight internal applications.
- Integrated **Slack API** commands, events and webhooks; automated document generation, approvals and e-signatures with PandaDoc.
- Used **Python** and **SQLite** for ETL, data cleaning and reporting; documented workflows and SOPs in Notion.
- Administered **Google Workspace**, ran internal utilities on Linux with Docker, and provided remote support through RustDesk, TeamViewer and Tailscale.
- Prototyped text extraction and summarization with local LLMs using **Ollama** and **Hugging Face**.

Project Web Developer / Automations

Apr 2023 - Sep 2023

VA LWIS Digital

- Updated client websites with HTML, CSS and JavaScript; resolved defects across client pages.
- Built Zapier workflows for intake, notifications and handoffs across forms, spreadsheets and CRM tools.
- Supported workstation and software setup, onboarded users to tools, and wrote quickstart and troubleshooting guides.

Onboarding Team Lead / Tech Support

Mar 2021 - Dec 2022

MIR Partners Inc

- Triage incoming support tickets, prioritized incidents and maintained response SLAs.
- Delivered remote support for desktop applications and peripherals; recorded fixes in a searchable FAQ.
- Investigated risk and fraud signals, escalated cases according to policy, and handled customer data securely.

Customer Support Representative (Tech Support)

Chime

- Resolved high-volume chat and email cases, including secure verification and sensitive-data handling.
- Explained technical and policy constraints in clear, empathetic language.

Jul 2020 - Dec 2020

Earlier support experience

The Office Gurus - Bilingual Customer Service Representative

Handled follow-ups, payment processing, data entry, reactivations and cancellations across chat, email and calls.

Nov 2019 - May 2020

Cash App - Tech Support Representative

Provided technical and customer support; collaborated across teams and supported risk and fraud reviews.

Jul 2019 - Nov 2019

Skills

Automation

n8n & Zapier
Salesforce development & automations
Workflow design & open-source CRMs

Development

Front-end & back-end development
JavaScript, Python, HTML & CSS
REST APIs, webhooks & Google Apps Script
Trading bot development

Data & scraping

Supabase, SQL & SQLite
Web scrapers & AI data extraction
Google Sheets & Monday.com
PandaDoc, Notion & Slack API

Infrastructure & security

VPS administration, Linux & Docker
Tailscale & private networks
Self-hosting & cybersecurity support
Google Workspace Admin
RustDesk & TeamViewer

AI & machine learning

Machine learning & local model fine-tuning
Ollama, Hugging Face & Google Colab
Text extraction & summarization

Development tools

Codex, Claude & Antigravity
Application & workflow debugging
Ticket triage & documentation

Personal AI lab: Run local AI models on my own **NVIDIA DGX Spark**.

Training & course certificates

Machine Learning / AI Engineer Career Path

Codecademy · Certificate of completion · Oct 20, 2025

[View certificate](#)

AI & Python

Build Chatbots with Python
OpenAI API Coding with Python
Learn Prompt Engineering
Learn Python 3

Web & platforms

Learn HTML
CSS: Box Model & Layout
Learn Node.js

Additional courses

Learn How to Use ChatGPT
Learn Recursion with Python
Intro to Cloud Computing
Introduction to Game Development

Defending Against AI-Gen Attacks
Learn PHP: Introduction
Learn C++: References & Pointers
Introduction to Project Management
